

EiClasses NEEDED IN MODEL

EiClasses Shown

Model also needs

- EmixBase and related types - Done by dividing emixBase (abstract) attribute and changing EiTenderType and EiTransactionType to inherit from emixEmixBase type indirectly through a specific TernixPowerProductType
- Deleted tenderID in EiTransactionType because it's inherited from EiTender.
- NOT CLEAR whether the EmixUid in EiTransaction differs from that in EiTender. Appear to be the same
